

Purpose: orthographic view creation, and visualisation in 3 dimensions

Assignment 2.1a

For each of the three objects shown, sketch the missing view. Include all hidden details and place the required view in the correct alignment with the given views. (Photocopy this sheet – or print out a PDF of this assignment from UW-LEARN.)

Pay close attention to 3. Most students sketch the top view incorrectly. Hint: look closely at the curved surface, and the notch cut into it.
